Why have my 128-year cycle/7*128-years/159 LWks cycle named *BONAVIAN* - a curiosity?
http://www.the-light.com/cal/bbv_bonavian.doc and

Home Page: <http://www.brijvij.com/>

Here are Brij Vij's contributions at Victor's upload area.

- About [Brij Bhushan Vij](#) [See: http://www.brijvij.com/bbv_vip-brief.pdf]
- Picture of [Harappan Calendar](#)

- What more need be done for The World Calendar?
http://www.brijvij.com/bb_metro-contrbn.2007.pdf
- During Y2009, International Astronomy Year attempted to draw attention on Harappa's calendar shell linked to 19-year/6932 ½ Tithi cycle – now, called Metonic cycle.
[See: http://www.brijvij.com/bb-calcs_IAU-luniSlroptions.pdf]

Also see: Home Page of Brij Bhushan Vij <http://www.brijvij.com/> discussing his results with Calndr-L group – especially Derek & Karl, who have been exploring his mind & calculations (not being an astronomy student). Recent discussions led Brij to demonstrate his linking (9*1730=15570)-year cycle, providing: [15570-yrs =5686821 days (809640+2595+168)=812403 weeks)=192573.90801611 lunation].
Mean Year =5686821/15570= 7*(52+1/6+168/15570) =365.24219653179191 days =365d 5h 48m 45s.78035.
Mean Lunation = 5686821/192574 = 29.530575259380809455067 days =29d 12h 44m 1s.702411
Current Value for Year =365.242189669781 days =365d 5h 48m 45s.1874691
Lunation =29.53058881 days =[29d 12h 44m 2s.873184].
Ratio, Year: Lunation =12.368266410797008419013640385317 [Also, 192574/15570 = 12.36827232]

ACKNOWLEDGEMENTS

I take this opportunity to thank one and all members of USMA & Calndr-L listserv for probing my mind and EXTRACTING the very best I had in me – especially Karl KEV Palmen, Derek Winder, Tom Peters, Victor Engel, Irv Bromberg and others. Being an autodidact and a non-astronomy student my posts may have upset some – and for their accepting me among them, as a man-on-street working with a purpose, in the hope that a positive outcome might result out of my calculations, in producing my several options for an alternative as The World Calendar between 1971 thro 2009.
